NAME
vospectra – Query VO spectral services for data

SYNOPSIS
vospectra [<opts>] <service> [<object> | <ra> <dec>] [<size>]

OPTIONS
The *vospectra* application accepts the following options:

−h, --help
Print a help summary to the terminal and exit. No processing is done following this flag.

All VODATA task options

DESCRIPTION
The *vospectra* task is a convenience application built on top of the *vodata* application, logically it will only query for spectral data and will set the appropriate flags when calling *vodata*.

For a complete list of options and a description of the task behavior, see the *VODATA* man page.

RETURN STATUS
On exit the **vospectra** task will return a zero indicating success, or a one indicating an error.

EXAMPLES
1) Query all services for spectra data of 3c273:

    % vospectra any 3c273

BUGS
No known bugs with this release.

Revision History
Feb 2013 - First public release

Author
Michael Fitzpatrick (fitz@noao.edu), Feb 2013
